Select Model > Raster. In the raster tab of the tab menu, select a raster file in your bucket. Click Apply. Close this dialog. In the preferences menu, click Print. In the print dialog, select a printer. Select File > Save as PDF. In the PDF Options dialog, select Printer profile. In the Printer Profile dialog, click Next. In the paper settings dialog, click OK. Open the PDF file in your favorite PDF viewer.

Q: System.currentTimeMillis() and System.nanoTime() seem to be never called in Android As you can see in the picture, when the method getTime() is called, it always returns the same value. I guess that's because it's never calling the method System.currentTimeMillis() and System.nanoTime(). Any ideas how to call these two methods properly on Android? A: I'm actually surprised you're not seeing the results shown in the picture. The only thing that seems odd to me is that the time value should be the exact same when the loop is the same time as the execution of the current thread. I'm not sure why you aren't seeing that. Here's a test case to show you that the time() / nanoTime() methods are called every time the thread executes. You can comment out the call to each method to see that they are executed at the same time.

```
public class TimeLoop { public static void main(String[] args) { long start = System.currentTimeMillis(); for (int i = 0; i
```
