Spyro: A Hero's Tail (PS2) marks the return of Spyro on PS2. Taking on the villainous Drek, who has stolen the golden dragon egg, Spyro must race across the world to find it and foil Drek's scheme. Spyro combines a new action-adventure gameplay formula with the ability to switch at will between an easy-to-learn flight mechanic and the more advanced, degree-of-difficulty terrain control system. Enhanced Character Design: Spyro is returning on PS2 with a cel-shaded, hand-drawn look courtesy of the teams at Insomniac Games and animator Andy Johnson. The result is a colorful, chibi-style Spyro that looks more like a furry lovable pal than an evil dragon! Combat with 3 New Weapons: Spyro has added a new attack-move system to his arsenal, and with it comes the ability to enjoy his moves in 3 different ways. Extra Size, Extra Strength: Spyro's ever-sprawling world is now available in a new 4:3 mode, showcasing game environments and video clips that run at a higher resolution than ever before. Special Features: Spyro will have many special features not found on any previous game. More Than Ever: Spyro includes a few new surprises, from the return of the mischievous Launchpad, who provides humorous commentary throughout the game, to bonus levels and special unlockables, such as sprites for Battle Mode and Spyro's most powerful attack. Playable Character Lei must first be unlocked in order to use this item, either by completing certain in-game objectives or by purchasing "Playable Character Lei Instant Unlock". What's new in Up All Night:

is a free indie game: it supports Touch Bar, App Store and Top Shelf, and it's got a score of 95/100 from (obviously) real game reviewers. It's also extremely easy to play: just press the A button to flee and release the bomb. It's available on the App Store and Google Play. I've been playing it for some while, and it's been growing on me. It's a great game to play alone: just flee and depress the bomb. I generally do a bit of running and bombing, and then the city is destroyed (and you can collect your rewards). But it's even better when you have a companion with you. You can chat to them, and if they decide to stay with you, then they get promoted and take over your profiles. Together, you'll destroy the city you were born in with a broken heart that keeps shredding the buildings that leave pieces of your family. You have two profiles, one that was born in the same time and place as your companion, and one that was born in another part of the city. They'll both destroy you and your companion in the same time, but the double bomb approach (double deprivation) will make you the bigger loser. The game also includes the Accident, a dramatic graphic where the companion gets killed, just by you and for no apparent reason. (The game also supports three profiles, but I found the twin one the most interesting. Really, though, you can fall to working alone, to making bombs and destroying buildings. It gets very easy, and you can do it knowing that the currency goes straight into your pocket. You can afford to run and bomb a few times,

since there are bonuses from killing lots and lots of civilians.) The first time you play you'll meet a homeless friend, who was saved by you in an accident and who later joins you in the game. He's wounded, so you need to help him and rush him to the hospital. He says that he's cut off from his family and even the sight of his car makes him cry. He recommends that you visit your parents, who are older than the rest of you. It's a great scene, when he tells you to go visit your parents. It's an epic move that feel like its intended to move the player emotionally.

----- The game was in production for four years, from June 2014 to October 2018, and releases in August 2018. Developer comments: I hope you enjoy this game as much as I enjoy making it! If you use my game, please give credit and do not use any assets beyond the characters and environments, unless otherwise stated. Also, read the OP here, before posting about the game here: Original creator's devlog here: Devin gave his opinion here: Here is a great video play-through of the game, with a mention of being "like f***ing point-and-clicky." Thanks to Dimm N0b: ----- Release Notes: (- due to a couple of crash bugs, there may be slight visual changes on the first play-through) #1 What's New: * Fixed a bug in the cape and headband systems! * Refactored NPC portrait dialogue system, so NPCs get more interesting dialogue as you play, and there's a new palette of voices for you to choose from. * Fixed a lot of bugs in the character creation system, and made it prettier, so now you can select gender, face shape, eyes and hair color, and shirt color. #2 Changes: * The main character has had a makeover, and some of the characters' hair has been changed. * The main battle is now a unique random-gen platformer for each run-through of the game. * Updated the game's main character design, so you'll see a big change now that I've had to deal with some health issues that were rearing their ugly heads in my mental health. * Finally added
