The moment I change the "pg" value to a number, the animation is done, but the problem is, it will not close, and remains open after the user goes back to the previous page. I have attached my code below. Thanks for the help
A: In this case you should be able to do something like: On page load remove all of your classes, fade them in, and then have a separate function that will remove all of those classes on click of another page. Like: `$(function(){ $(''.someclass').fadeIn(500); $('".someclass").removeClass("fadeIn"); });` 6d1f23a050
